

INDUSTRIAL VIST

Date of Visit: 10th July 2025

Place: Toyota Kirloskar Motor Private. Ltd., Bidadi, Karnataka

No of Students: 23

Our industrial visit to Toyota Motors in Bidadi was an enriching and insightful experience. We started our journey at 7:30 a.m, and reached the Toyota plant by 10:00 a.m. Upon arrival, we were warmly welcomed by the company representatives and guided to a shuttle bus that took us around the vast manufacturing facility.

During the visit, we were given an overview of Toyota's history, starting from its origin in Japan and its growth into one of the world's leading automobile manufacturers. The representatives explained the company's core principles, including the Toyota Production System (TPS), which focuses on efficiency, quality, and continuous improvement.

Students also got the opportunity to understand the manufacturing process — from assembling parts and painting to quality checks and final inspection. The precision and discipline followed at every stage reflected Toyota's commitment to excellence and safety.

Another interesting part of the visit was learning about Toyota's educational initiatives. The company runs institutions that provide free education and skill development programs for children, especially from nearby rural areas. This initiative helps promote learning opportunities and career growth for young students.

Toyota also highlighted their Corporate Social Responsibility (CSR) activities, which include environmental protection projects, road safety campaigns, tree plantation drives, water conservation, and community development programs. These efforts show Toyota's dedication to giving back to society and maintaining sustainable growth.

Overall, the visit to Toyota Motors, Bidadi, was highly informative and inspiring. It gave us valuable exposure to industrial practices, social responsibility, and the importance of innovation and teamwork in achieving success.
